Gosto 151

Estima-se que 350 milhões de pessoas (cerca de 10% da população masculina do mundo) sejam daltónicas.

A missão do projeto ColorADD® é facilitar a identificação de cor para essas pessoas, contribuindo de forma determinante para a integração social e bem-estar, tornando a comunicação mais eficiente, responsável e inclusiva.

O ColorADD é uma linguagem única, universal, inclusiva e não discriminativa que permite ao indivíduo portador de daltonismo identificar cores, tendo um imenso espectro de aplicação pessoal, em empresas ou entidades sempre que a cor seja um fator de identificação, orientação ou escolha.

Boas leituras... Bom trabalho... e Boa saúde!
