As nossas sugestões WWW

Multiple Sclerosis (MS) International Federation

<https://www.msif.org/>

A **Multiple Sclerosis (MS) International Federation** é uma rede global única de organizações dedicadas à esclerose múltipla (EM), pessoas afectadas por ela, voluntários e funcionários de todo o mundo. Tem por objectivo chamar a atenção, mobilizar e unir recursos para melhorar a qualidade de vida de todos os que são afectados pela doença e tentar erradicá-la.

The screenshot shows the MS International Federation website. At the top left is the logo, which consists of a stylized orange star shape next to the text 'ms international federation'. To the right of the logo is a search bar and a 'Donate' button. Below the logo is a navigation menu with links: 'About MS', 'Living with MS', 'Research', 'Resources', 'News & events', 'About us', and 'Get involved'. The main content area is divided into six sections. The top row has three sections: 1. 'What is MS?' with a blue background, a description 'Multiple sclerosis (MS) is a progressive disease of the nervous system', and an orange 'Learn more' button. 2. 'Progressive MS' with a blue background, a description 'The International Progressive MS Alliance works to speed up the development of treatment for progressive MS', and an orange 'Learn more' button. 3. 'World MS Day' with a teal background, a description 'World MS Day is the global campaign to raise awareness of MS, led by MSIF and its members', and an orange 'Learn more' button. The bottom row has three sections: 1. An image of a family (a woman, a man, and a child) outdoors. 2. An image of a group of people in blue shirts and orange balloons. 3. An image of an elderly woman in a wheelchair outdoors.

Tem disponível o Atlas da EM que abrange três temas principais: a epidemiologia, os recursos disponíveis para diagnosticar e tratar a doença e o suporte disponível para pessoas com EM em 124 países. Os seus principais objectivos são: estimular a recolha de dados sistemáticos adicionais, em particular os dados sobre a epidemiologia da EM; identificar lacunas em recursos e serviços; e incentivar o desenvolvimento de políticas, serviços e formações essenciais.
